

PKU **GOLIKE**
SATELLITE SYMPOSIUM

Physiological absorption of
amino acids: nitrogen balance
and patient outcomes

Wednesday, 4th September 2019
07.30 - 08.30

Hall: Mees & Van Welde
4th floor

WELCOME BREAKFAST

Physiological absorption of
amino acids: nitrogen balance
and patient outcomes

07.30 - 07.35

Introduction and objectives

Prof. Dr. Med. Ania Muntau

University Children's Hospital, University Medical Center Hamburg-Eppendorf, Hamburg, Germany

07.35 - 07.50

Prolonged release of amino acids: what is it and why is it important

Prof. Anita MacDonald

Department of Dietetics, Birmingham Children's Hospital, Birmingham, United Kingdom

07.50 - 08.05

**Physiological absorption of amino acids:
preclinical evidences of a different outcome**

Prof. Júlio César Rocha

Centro de Genética Médica Jacinto de Magalhães, Centro Hospitalar do Porto, Porto, Portugal

08.05 - 08.20

**Patients receiving prolonged-release amino acids
for PKU management: initial evidences**

Prof. Alberto Burlina

Division of Inherited Metabolic Diseases, University Hospital of Padova, Padova, Italy

08.20 - 08.30

Panel discussion: open questions

Prof. Dr. Med Ania Muntau

University Children's Hospital, University Medical Center Hamburg-Eppendorf, Hamburg, Germany
